

Amy Pearl

Dear HTG -

Just a note to tell you of a success we've had at Sun Microsystems, here in Mountain View. After a several year, on again, off again effort, we have gotten our company's non-discrimination clause modified. It now includes that Sun will not discriminate on the basis of sexual or gender orientation. This was approved by an executive committee in November of 1988.

In other news, there has been an informal group at Sen for years, open to gay, lesbian, bisexual, transsexual and transvestite employees. We are currently trying to put together a real organization for people interested in alternative gender and sexuality issues. One of the hardest tasks is naming the group - we're open to suggestions. ~~🌀~~

To everyone - Keep up the good work! Amy Peard
